

PROBLEM	CAUSE	REMEDY
Chlorine Odour	Chloramines	Adjust pH with EASY-UP or EASY-DOWN. Add SHOCK, LITE-SHOCK or SHOXITE.
Black Algae Spots or Mustard Algae	Insufficient chlorine or bromine	Adjust pH with EASY-UP or EASY-DOWN. Add 5 to 10 times the normal addition of SHOCK. Then add MBA-60 or 4LG.
Green or Brown Algae	Insufficient chlorine or bromine	Adjust pH with EASY-UP or EASY-DOWN. Add 3 to 5 times the normal addition of SHOCK. Then add MBA-60 or 4LG.
Cloudy Water	High pH Early algae formation Poor Filtration	Test and adjust the pH with EASY-DOWN. Add SHOCK, LITE-SHOCK or SHOXITE. Backwash and check filter. Then add POLISH PLUS pool water clarifier.
Colored Water	Low Total Alkalinity Low pH	Add MSR to prevent staining. Test and adjust Total Alkalinity with BUFFER Test and adjust pH with EASY-UP.
Corrosion of Metal Parts	Low Total Alkalinity Low pH Low Hardness	Add MSR to prevent staining. Test and adjust Total Alkalinity with BUFFER Test and adjust pH with EASY-UP. Test and adjust Hardness with MOR-CAL.
Eye irritation and Skin Irritation	pH imbalance or Chloramines	Adjust pH with EASY-UP or EASY-DOWN. SHOCK-treat with SHOCK, LITE-SHOCK or SHOXITE.
High Chlorine or Bromine Consumption	High Bathing Load High Temperature Heavy Rainfall	Add SHOCK, LITE-SHOCK or SHOXITE immediately. Add SHOCK, LITE-SHOCK or SHOXITE immediately. Check stabilizer level.
Scale Formation	High Mineral Content and High pH	Adjust water balance. To prevent further scaling add SHEILD.
Staining	Low pH Low Total Alkalinity High Metal Content High pH	Control staining with MSR. Take sample to dealer for testing. Control staining with MSR. Take sample to dealer for testing. Control staining with MSR. Take sample to dealer for testing. Balance water. Add SHIELD
